Office Action Summary	Application No. 10/660,627	Applicant(s) SIMON, BERNARD	
	Examiner Blair M. Johnson	Art Unit 3634	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

Claims 8,9,12 and 13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The detachable fastening device (claims 8,9) and the drive means being housed (claim 12) or "borne" (claim 13) have not been adequately disclosed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Derman in view of Wilson.

Derman discloses two sets of leaves that are mounted on rods 26, which are the mechanical equivalent of tubes. The drive means limitation is met by a human opening the door. What is not shown are the accordion folding nature of the leaves and the corresponding oblong openings to permit such folding. However, Wilson discloses such a closure structure with oblong openings through which a support tube extends. In view of this teaching, it would have been obvious to modify Derman to have such a structure

since these leaves are stronger and present what some might view as a pleasing appearance.

Claims 6,7,10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Derman in view of Wilson as applied above, and further in view of Guth et al.

The use of a motor and cable drive system as recited is well known in the art, as disclosed by Guth et al. It would have been obvious to modify Derman to have such a drive system so as to automate the door.

Allowable Subject Matter

Claims 2,3 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
